Dikkat bağımsızlık yapar

Okcubaba was established in 2016 in Bursa, Türkiye.

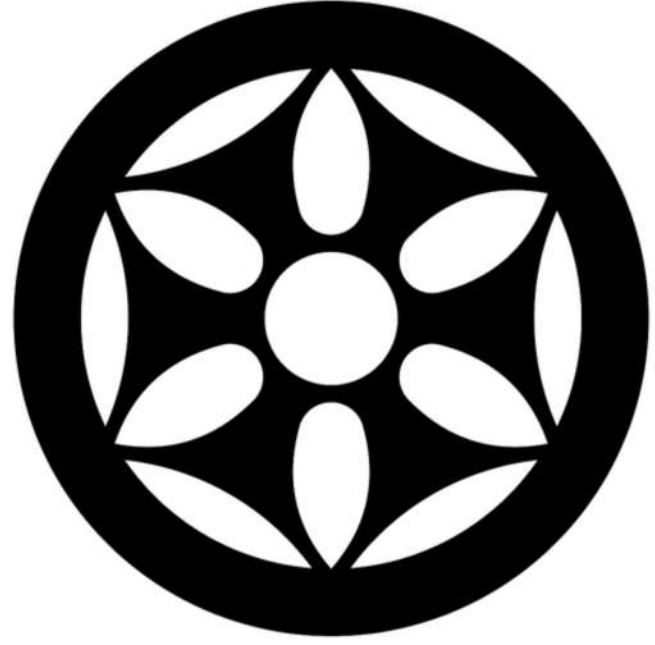

We produce Traditional Turkish Bows, Arrows and Equipment.

We inspired the traditional Turkish Bow form from the 16th Century Ottoman Bow form of Topkapi Palace.

Many athletes won championships with our Bows in the Target (Putu) Archery category. In 2022, we broke the record in the Long Range Archery category by making a shot of 571.84 meters with the range bow we produced.

Numerous championships in Türkiye, World Nomad Games Championship,

Many international championships, and finally, in 2025, at the World Traditional Archery Federation World Cup held in Ulsan, Korea, our VAV bow became World 1st in the 70-meter target competition and Team competition. Furthermore, our new bow model, ULU YAY, came in 4th place in the 30-meter Kazakh target Zhamby category.
